

The current plans of Sinclair Group to use our public airways to force feed their politically biased commercial against John Kerry in the midst of a very tight election shows how much protection we citizens have lost with the new media ownership laws.

From what I understand, much of what is being stated in their film/commercial (anything but news) includes lies that have already been debunked. I would respectfully request that you reconsider the recent laws that allow consolidation of media companies to control larger and larger shares of the public airways. Thank you very much.
